*~ Community Offender Census 2011 ~*

*Explanatory Notes*

---

## EXPLANATORY NOTES

---

### a) General Information

The New South Wales Community Offender Census was initially developed following a proposal by the Australian Bureau of Statistics (ABS) to develop a National Community Based Corrections census. A 12 month feasibility study was implemented by the ABS in May 2006, in which NSW participated. Although the National Census did not proceed, Corporate Research Evaluation and Statistics (CRES) within Corrective Services NSW (CSNSW) continued with development of a census for NSW community based offenders. The NSW Community Offender Census has been designed to complement the existing custody based NSW Inmate Census. The NSW Community Offender Census recognises the substantial population of offenders managed by Community Offender Services (COS), a section of CSNSW.

All data were extracted from the Offender Integrated Management System (OIMS) used by CSNSW to manage offenders both in the community and custody, for all records current as at 30 June 2011. The data were also manually screened for any potential errors and inconsistencies in order to maximise reliability.

### b) Offenders and legal orders

A key component of understanding the community offender population is the distinction between the number of total offenders and the number of offenders with different types of orders. For the purposes of this census, an offender is an **individual who may be subject to several different orders simultaneously**. For example, it is possible for an individual offender to be serving a Community Service Order at the same time as a Probation order. Some offenders may also be part of the custodial inmate population on the day of the census, either in full time custody or periodic detention. In these cases each offender will be counted once within each order category, and once in the total population. For this reason, numbers from individual order categories will not sum to the total figure. Offenders who are in custody, and therefore will also be counted in the inmate census, are identified under the variable 'In custody at census date', and should be removed before undertaking any merging of community and custodial population figures.

### c) Order Types

Data is reported for four different order types, corresponding to those reported for the annual Productivity Commission "Report on Government Services" (ROGS) with an additional section for Intensive Correction Orders. These order types represent aggregates of a range of legal orders and are defined as follows

#### *Supervision*

Labelled "Bonds (probation)" in previous editions of this series, this category includes all supervised good behaviour bonds, suspended sentences, recognisances and licences, extended supervision orders, bail supervision orders, drug court orders and intensive correction orders, as well as probation specified as a condition of community service orders. Intensive Correction orders have been added in the 2011 census after being introduced in October 2010 in NSW. Whilst having supervision, reparation and restricted movement components they have been included in this category in line with nationally agreed counting rules concerning supervision orders.

Data within this category differ slightly from those reported for the ROGS, as community service orders with a programs component have been excluded. This was done primarily to reduce double counting, since only a single legal order is actually issued in these cases. Community service offenders with programs hours are recorded within the community service population, and are identified within the count of program hours assigned. The number of offenders on which this impacts is minimal.

*Parole*

Includes all supervised parole orders, both court based and those issued by the State Parole Authority (which includes orders such as formal transfer of interstate parole and balance of parole). Does not include offenders released to unsupervised parole.

*Community Service (CSO)*

Includes all community service orders and fine default orders.

*Home Detention*

Includes home detention orders.

*Intensive Correction Orders*

Includes intensive correction orders only. As previously noted, Intensive Correction Orders (ICOs) have been included in the order category "Supervision". As they are a new order type, with the potential to impact significantly on custodial and community offender populations they are reported separately here to provide greater detail.

Refer to Appendix 3 for a detailed list of order categorisations.

**d) Scope of data collection**

This publication contains summary statistics of offenders with legal orders registered at COS district offices on the 30 June 2011. In order to maintain consistency with figures reported under established counting rules, all offenders have been included regardless of factors such as legal status of the order, or whereabouts of the offender (for example, some offenders were interstate or whereabouts unknown at the census date).

In order to reflect the statistical needs of COS management and provide a more meaningful count of the population, all offenders have been defined as either 'Active' or 'Administrative' throughout the census. These categories are defined as follows:

***Active***

The offender has a current legal order and is assigned to the caseload of a probation and parole officer who is managing that order to ensure compliance with the conditions. For example, provision of case management, attendance at programs, urinalysis, attendance at Community Service work, or any other form of active involvement with the offender.

These offenders constitute the population which could be considered as most relevant to any current analysis of community offenders.

---

### ***Administrative***

COS has some interest in the offender, but the offender is not being actively managed or monitored as at the census date. This may be for a variety of reasons. Usually the offender is not assigned to a probation and parole officer's workload, but may be placed in an administrative caseload to be periodically reviewed where further action is awaited (such as resolution of court matters). There are a wide range of specific reasons why an offender's order may be held for administrative purposes, but some of the more common causes include:

*Breach action* – the offender has not complied with their order and COS has commenced breach action in court. In some cases the offender may have absconded and a warrant may have been issued. The order is often retained until such time as the court resolves the breach matter, which may take several months.

*Temporary inability to manage the order* – the offender cannot be directly managed in the community because they have been placed in full time custody for several months, have been hospitalised, have been granted permission to travel outside of the State, or otherwise are not within the NSW community for a period of time. In most cases the offender will be monitored elsewhere – such as where they are in custody or in another jurisdiction – and supervision will recommence once the offender has returned to the community.

*Order completion* – the offender's order has expired and COS has no further legal authority to manage the offender. The offender's record may remain active in the system for a brief period of time for administration purposes such as completion of a summary of the order outcomes and offender responsibility which can be used to inform future contacts with the offender.

### **e) Aboriginality**

An offender is recorded as an Aboriginal / Torres Strait Islander where they have self identified as such in any current or historical records held by Corrective Services NSW.

### **f) Cultural Background**

Cultural background is coded according to the Second Edition of the Australian Standard Classification of Cultural and Ethnic Groups (ASCCEG) (Australian Bureau of Statistics Catalogue No: 1249.0, ABS 2005). In a small number of cases where cultural background was not recorded, any available country of birth and Aboriginality data have been used to determine a cultural region of origin. In these cases, the offender has been placed in the specific cultural grouping of 'not elsewhere classified' (n.e.c.) within the relevant broader cultural group.

### **g) Prior Imprisonment**

Prior imprisonment is calculated based on any full time imprisonment (including unsentenced) ending prior to the census date, at any adult NSW correctional centre. This includes where a prior period of imprisonment may be related to the current sentence – as is the case with parole. The purpose of this item is to indicate which offenders have previously been managed by the custodial arm of CSNSW.

## **h) Office Location**

In the majority of cases the offender was assigned to one of the relevant order types at a single district office. However, it is possible for an offender with multiple orders to be assigned to two different locations. In order to maintain simplicity within the dataset, a single location was identified for all offenders. Where there were multiple assignments, preference was given to locations with active orders over those with administrative ones, then to locations with supervision orders, then to CSO. The number of instances where offenders had active orders at 2 locations was minimal.

## **i) Concept of an 'Episode'**

An episode is defined as a single period of continuous contact with COS up until the Census date. It does not include any custodial bookings, although often a custodial booking may overlap with a community one. Episode length is calculated by identifying the earliest start date of a community based order in a series of unbroken community contact.

## **j) Aggregate order length**

Aggregate order length represents the time from the earliest start date of an offender's community based orders to the final expiry date.

Order length refers only to the community component of an offender's sentence. For example, where an offender is subject to a parole order, order length refers only to that order and does not include the custodial portion of the sentence.

Order length will not always correspond to the actual time ultimately served. For instance, where an offender is breached, the order may be revoked prior its completion. Additionally, supervision may not always last for the duration of an order, such as in the case of many bonds, where the court may allow supervision to cease ahead of the total order expiry if deemed appropriate by COS.

It is important to note that there are a range of statutory limitations on many of the community based orders. For example, under the Crimes (Sentencing Procedure) Act 1999, a Section 9 Good Behaviour Bond may not exceed 5 years, and a Home Detention order may not exceed 18 months.

It may however be possible for an offender's aggregate sentences to exceed these limits. For example, an offender who has received a 5 year Section 9 Bond receives another 5 year Section 9 Bond on unrelated matters one year into the first order, creating an aggregate sentence of 6 years.

## **k) Community Service Hours completed by offenders**

Community Service Hours are typically recorded at an offender's work site by a sessional supervisor. These records are then collected by COS staff on a regular basis, and entered into the system by the staff member. Due to this process there are small delays between the work hours being completed and data being entered into OIMS.. Hours completed were subsequently retrieved 1(one) week following the census date to allow for data entry lag, and then reviewed again in August 2011 to check for any significantly delayed data entry.

---

## **l) Most Serious Offence (MSO)**

Most Serious Offence (MSO) was determined by using the National Offence Index (NOI), which is based on the Australian Standard Offence Classification (ASOC), 2008 (see below). There is presently no definitive hierarchy of penalties to allow use of community sentence details to assist in determining seriousness of offence within all categories. For example, determining whether a 6 month suspended sentence constitutes a more serious penalty than a 3 year Section 9 bond is open to argument in either direction. Although the use of the NOI also presents problems, since the code does not consider the magnitude of the offence in the same manner that sentence length is able to do for the inmate population, at the present point in time it is considered the most pragmatic approach.

In reviewing the validity of this process, it was found that in any case the majority of offenders have small numbers of offences, often within the same ASOC division, or with one clear cut 'serious' offence. Subsequently the potential for miscoding is considered to be minimal. This procedure may however be reviewed in the future.

## **m) Classification of offences**

In this publication offences have been classified according to the Australian and New Zealand Standard Offence Classification (ANZSOC) (Australian Bureau of Statistics Catalogue No: 1234.0, third edition 2011). Previous Community Offender Census documents have used ASOC 1997 to classify offences. Data have been reported at the division and subdivision levels, with assault offences being broken down to group level due to large numbers within the subdivision.

## **n) Federal offences**

Identification of offenders with federal offences was based on order types and offence codes. Offenders with any federal order type (such as a Section 20 Bond under the Commonwealth Crimes Act 1914), or an offence which had been flagged as Federal were included. Where a conflict existed, for example a Section 19 bond attached to an offence identified as being a State offence, offence description was checked and where necessary court records were also accessed to determine the relevant status.

## **o) Statistical Subdivision of Residence**

Statistical Subdivision is defined according to the Australian Standard Geographical Classification (ASGC), (Australian Bureau of Statistics Catalogue No: 1216, ABS 2009). Under this system, where the subdivision uses the suffix 'SD Bal', the statistical subdivision has been defined by taking the statistical division (the next highest level of categorisation) and removing a statistical district (a significant city area, also defined by the ASGC) which also constitutes a subdivision. So for example, the Hunter SD Bal subdivision is the part of the Hunter statistical division outside of the Newcastle subdivision.

1. Number of order categories reflects the different types of orders to which an offender is subject, as offenders may have more than one order active at a time. "Category" level includes Home Detention, Community Service, Supervision and Parole. "Sub category" levels includes home detention, fine default, community service order, bail, bond, suspended sentence, extended supervision, drug court, probation as condition of CSO, intensive correction order, Court parole, and Parole Authority parole. Offenders may also have multiple orders of the same sub-type (eg multiple bonds), although this is not shown here.

2. A breach application means that at some point in the life of the order the offender has been reported to the relevant authority for failure to comply with the conditions of that order. In some cases this may only be the result of a routine notification - such as in the case of new convictions. It does not always result in a recommendation or a decision for the order to be revoked. For example, if the breach was considered minor, in a warning might be issued instead.

1. An active PSR means that the offender has new convictions which are before the courts awaiting sentencing, and COS is preparing a report to advise on the offenders eligibility for community based sentences. Offenders may also be referred to COS for pre sentence assessment by the courts without any additional supervision order. Those offenders are not counted here, and do not constitute part of the census population. However, PSRs do constitute a large portion of the workload of COS, with 26,526 such reports being prepared in 2010-11.

1. Minimum contact levels are based on current Departmental policy guidelines and indicate the minimum frequency of offender intervention - which may include offender contact with the supervising officer, attendance at offender programs, or other forms of intervention. This is based on an offender needs assessment. Some offenders may be subject to more stringent supervision than the original level assessed.

2. Home detention involving electronic monitoring and frequent contact / intervention

3. New offenders are assessed over a 6 week period following reception before a minimum contact level is determined. During this time contact levels are likely to be frequent. Offenders on CSO do not require assessment as they are not case managed in the manner that offenders on probation and parole are, as their attendance requirements are determined based on the work hours assigned and not case management and monitoring. If an offender is subject to an intensive supervision order, this overrides any other assessment or absence of assessment, hence the number of offenders with no assessment for identifying relevant issues is slightly higher than those missing a minimum contact level

4. This list is not exhaustive and is restricted to certain factors contained in the Level of Service Inventory - Revised (with the exception of Domestic Violence, see below) which is used to assess offenders under supervision. Only those factors considered to be the most concise have been utilised, although it should be noted that even this list contains items which are quite broad in nature.

5. Domestic violence is determined by a combination of assessment and available offence data relating to breach of Apprehended Domestic Violence Orders, and may not always involve offences for physical violence, indeed the offender may also be a victim. In some cases sufficient data is not available to determine if domestic violence is relevant or not, therefore these figures should be regarded only as an approximate indication of domestic violence as a general issue that impacts the offender in some way.

1. Offenders in periodic detention may be both under active supervision and attending detention simultaneously. Offenders in full time custody may be there for either a remand or a new sentence, and are generally unable to be actively supervised on their community order, however offenders may often only be in custody for a brief period of time (eg awaiting a court hearing for bail determination) which does not immediately impact on the ability of the order to be administered. The event which caused them to return to custody (for example, a new charge), may however have other repercussions, such as breach action, or an increase in supervision levels.

1. Number of order categories reflects the different types of orders to which an offender is subject, as offenders may have more than one order active at a time. "Category" level includes Home Detention, Community Service, Supervision and Parole. "Sub category" levels includes home detention, fine default, community service order, bail, extended supervision, bond, suspended sentence, drug court, probation as condition of CSO, intensive correction order, Court parole, and Parole Authority parole. Offenders may also have multiple orders of the same sub-type (eg multiple bonds), although this is not shown here.

2. A breach application means that at some point in the life of the order the offender has been reported to the relevant authority for failure to comply with the conditions of that order. In some cases this may only be the result of a routine notification - such as in the case of new convictions. It does not always result in a recommendation or a decision for the order to be revoked. For example, if the breach was considered minor, a warning might be issued instead.

1. An active PSR means that the offender has new convictions which are before the courts awaiting sentencing, and COS is preparing a report to advise on the offenders eligibility for community based sentences. Offenders may also be referred to COS for pre sentence assessment by the courts without any additional supervision order. Those offenders are not counted here, and do not constitute part of the census population. However, PSRs do constitute a large portion of the workload of COS, with 26,526 such reports being prepared in 2010-11.

<b>TOTAL</b>	<b>5594</b>	<b>83.6%</b>	<b>1173</b>	<b>83.5%</b>	<b>na</b>	<b>na</b>	<b>7531</b>	<b>93.0%</b>

1. Minimum contact levels are based on current Departmental policy guidelines and indicate the minimum frequency of offender intervention - which may include offender contact with the supervising officer, attendance at offender programs, or other forms of intervention. This is based on an offender needs assessment. Some offenders may be subject to more stringent supervision than the original level assessed.

2. Home detention involving electronic monitoring and frequent contact / intervention

3. New offenders are assessed over a 6 week period following reception before a minimum contact level is determined. During this time contact levels are likely to be frequent. Offenders on CSO do not require assessment as they are not case managed in the manner that offenders on probation and parole are, as their attendance requirements are determined based on the work hours assigned and not case management and monitoring. If an offender is subject to an intensive supervision order, this overrides any other assessment or absence of assessment, hence the number of offenders with no assessment for identifying relevant issues is slightly higher than those missing a minimum contact level

4. This list is not exhaustive and is restricted to certain factors contained in the Level of Service Inventory - Revised (with the exception of Domestic Violence, see below) which is used to assess offenders under supervision. Only those factors considered to be the most concise have been utilised, although it should be noted that even this list contains items which are quite broad in nature.

5. Domestic violence is determined by a combination of assessment and available offence data relating to breach of Apprehended Domestic Violence Orders, and may not always involve offences for physical violence, indeed the offender may also be a victim. In some cases sufficient data is not available to determine if domestic violence is relevant or not, therefore these figures should be only an approximate indication of domestic violence as a general issue that impacts the offender in some way.

1. Offenders in periodic detention may be both under active supervision and attending detention simultaneously. Offenders in full time custody may be there for either a remand or a new sentence, and are generally unable to be actively supervised on their community order, however offenders may often only be in custody for a brief period of time (eg awaiting a court hearing for bail determination) which does not immediately impact on the ability of the order to be administered. The event which caused them to return to custody (for example, a new charge), may however have other repercussions, such as breach action, or an increase in supervision levels.

<b>TOTAL</b>	3261	100.0%	335	100.0%	599	100.0%	4195	100.0%

1. Number of order categories reflects the different types of orders to which an offender is subject, as offenders may have more than one order active at a time. "Category" level includes Home Detention, Community Service, Supervision and Parole. "Sub category" levels includes home detention, fine default, community service order, bail, bond, suspended sentence, drug court, probation as condition of CSO, Court parole, and Parole Authority parole. Offenders may also have multiple orders of the same sub-type (eg multiple bonds), although this is not shown here.

2. A breach application means that at some point in the life of the order the offender has been reported to the relevant authority for failure to comply with the conditions of that order. In some cases this may only be the result of a routine notification - such as in the case of new convictions. It does not always result in a recommendation or a decision for the order to be revoked. For example, if the breach was considered minor, in a warning might be issued instead.

1. An active PSR means that the offender has new convictions which are before the courts awaiting sentencing, and COS is preparing a report to advise on the offenders eligibility for community based sentences. Offenders may also be referred to COS for pre sentence assessment by the courts without any additional supervision order. Those offenders are not counted here, and do not constitute part of the census population. However, PSRs do constitute a large portion of the workload of COS, with 26,526 such reports being prepared in 2010-11.

<b>TOTAL</b>	<b>3082</b>	<b>94.5%</b>	<b>318</b>	<b>94.9%</b>	<b>na</b>	<b>na</b>	<b>3400</b>	<b>94.5%</b>

1. Minimum contact levels are based on current Departmental policy guidelines and indicate the minimum frequency of offender intervention - which may include offender contact with the supervising officer, attendance at offender programs, or other forms of intervention. This is based on an offender needs assessment. Some offenders may be subject to more stringent supervision than the original level assessed.

2. Home detention involving electronic monitoring and frequent contact / intervention

3. New offenders are assessed over a 6 week period following reception before a minimum contact level is determined. During this time contact levels are likely to be frequent. Offenders on CSO do not require assessment as they are not case managed in the manner that offenders on probation and parole are, as their attendance requirements are determined based on the work hours assigned and not case management and monitoring. If an offender is subject to an intensive supervision order, this overrides any other assessment or absence of assessment, hence the number of offenders with no assessment for identifying relevant issues is slightly higher than those missing a minimum contact level

4. This list is not exhaustive and is restricted to certain factors contained in the Level of Service Inventory - Revised (with the exception of Domestic Violence, see below) which is used to assess offenders under supervision. Only those factors considered to be the most concise have been utilised, although it should be noted that even this list contains items which are quite broad in nature.

5. Domestic violence is determined by a combination of assessment and available offence data relating to breach of Apprehended Domestic Violence Orders, and may not always involve offences for physical violence, indeed the offender may also be a victim. In some cases sufficient data is not available to determine if domestic violence is relevant or not, therefore these figures should be only an approximate indication of domestic violence as a general issue that impacts the offender in some way.

1. Offenders in periodic detention may be both under active supervision and attending detention simultaneously. Offenders in full time custody may be there for either a remand or a new sentence, and are generally unable to be actively supervised on their community order, however offenders may often only be in custody for a brief period of time (eg awaiting a court hearing for bail determination) which does not immediately impact on the ability of the order to be administered. The event which caused them to return to custody (for example, a new charge), may however have other repercussions, such as breach action, or an increase in supervision levels.

1. Number of order categories reflects the different types of orders to which an offender is subject, as offenders may have more than one order active at a time. "Category" level includes Home Detention, Community Service, Supervision and Parole. "Sub category" levels includes home detention, fine default, community service order, bail, bond, suspended sentence, drug court, probation as condition of CSO, Court parole, and Parole Authority parole. Offenders may also have multiple orders of the same sub-type (eg multiple bonds), although this is not shown here.

2. A breach application means that at some point in the life of the order the offender has been reported to the relevant authority for failure to comply with the conditions of that order. In some cases this may only be the result of a routine notification - such as in the case of new convictions. It does not always result in a recommendation or a decision for the order to be revoked. For example, if the breach was considered minor, in a warning might be issued instead.

1. An active PSR means that the offender has new convictions which are before the courts awaiting sentencing, and COS is preparing a report to advise on the offenders eligibility for community based sentences. Offenders may also be referred to COS for pre sentence assessment by the courts without any additional supervision order. Those offenders are not counted here, and do not constitute part of the census population. However, PSRs do constitute a large portion of the workload of COS, with 26,526 such reports being prepared in 2010-11.

<b>TOTAL</b>	<b>1138</b>	<b>49.6%</b>	<b>219</b>	<b>47.3%</b>	<b>na</b>	<b>na</b>	<b>1357</b>	<b>49.2%</b>

1. Minimum contact levels are based on current Departmental policy guidelines and indicate the minimum frequency of offender intervention - which may include offender contact with the supervising officer, attendance at offender programs, or other forms of intervention. This is based on an offender needs assessment. Some offenders may be subject to more stringent supervision than the original level assessed.

2. Home detention involving electronic monitoring and frequent contact / intervention

3. New offenders are assessed over a 6 week period following reception before a minimum contact level is determined. During this time contact levels are likely to be frequent. Offenders on CSO do not require assessment as they are not case managed in the manner that offenders on probation and parole are, as their attendance requirements are determined based on the work hours assigned and not case management and monitoring. If an offender is subject to an intensive supervision order, this overrides any other assessment or absence of assessment, hence the number of offenders with no assessment for identifying relevant issues is slightly higher than those missing a minimum contact level

4. This list is not exhaustive and is restricted to certain factors contained in the Level of Service Inventory - Revised (with the exception of Domestic Violence, see below) which is used to assess offenders under supervision. Only those factors considered to be the most concise have been utilised, although it should be noted that even this list contains items which are quite broad in nature.

5. Domestic violence is determined by a combination of assessment and available offence data relating to breach of Apprehended Domestic Violence Orders, and may not always involve offences for physical violence, indeed the offender may also be a victim. In some cases sufficient data is not available to determine if domestic violence is relevant or not, therefore these figures should be only an approximate indication of domestic violence as a general issue that impacts the offender in some way.

1. Offenders in periodic detention may be both under active supervision and attending detention simultaneously. Offenders in full time custody may be there for either a remand or a new sentence, and are generally unable to be actively supervised on their community order, however offenders may often only be in custody for a brief period of time (eg awaiting a court hearing for bail determination) which does not immediately impact on the ability of the order to be administered. The event which caused them to return to custody (for example, a new charge), may however have other repercussions, such as breach action, or an increase in supervision levels.

1. Number of order categories reflects the different types of orders to which an offender is subject, as offenders may have more than one order active at a time. "Category" level includes Home Detention, Community Service, Supervision and Parole. "Sub category" levels includes home detention, fine default, community service order, bail, bond, suspended sentence, drug court, probation as condition of CSO, Court parole, and Parole Authority parole. Offenders may also have multiple orders of the same sub-type (eg multiple bonds), although this is not shown here.

2. A breach application means that at some point in the life of the order the offender has been reported to the relevant authority for failure to comply with the conditions of that order. In some cases this may only be the result of a routine notification - such as in the case of new convictions. It does not always result in a recommendation or a decision for the order to be revoked. For example, if the breach was considered minor, in a warning might be issued instead.

1. An active PSR means that the offender has new convictions which are before the courts awaiting sentencing, and COS is preparing a report to advise on the offenders eligibility for community based sentences. Offenders may also be referred to COS for pre sentence assessment by the courts without any additional supervision order. Those offenders are not counted here, and do not constitute part of the census population. However, PSRs do constitute a large portion of the workload of COS, with 26,526 such reports being prepared in 2010-11.

1. Minimum contact levels are based on current Departmental policy guidelines and indicate the minimum frequency of offender intervention - which may include offender contact with the supervising officer, attendance at offender programs, or other forms of intervention. This is based on an offender needs assessment. Some offenders may be subject to more stringent supervision than the original level assessed.

2. Home detention involving electronic monitoring and frequent contact / intervention

3. New offenders are assessed over a 6 week period following reception before a minimum contact level is determined. During this time contact levels are likely to be frequent. Offenders on CSO do not require assessment as they are not case managed in the manner that offenders on probation and parole are, as their attendance requirements are determined based on the work hours assigned and not case management and monitoring. If an offender is subject to an intensive supervision order, this overrides any other assessment or absence of assessment, hence the number of offenders with no assessment for identifying relevant issues is slightly higher than those missing a minimum contact level

4. This list is not exhaustive and is restricted to certain factors contained in the Level of Service Inventory - Revised (with the exception of Domestic Violence, see below) which is used to assess offenders under supervision. Only those factors considered to be the most concise have been utilised, although it should be noted that even this list contains items which are quite broad in nature.

5. Domestic violence is determined by a combination of assessment and available offence data relating to breach or apprehended domestic violence Orders, and may not always involve offences for physical violence, indeed the offender may also be a victim. In some cases sufficient data is not available to determine if domestic violence is relevant or not, therefore these figures should be taken only as an approximate indication of domestic violence as a general issue that impacts the offender in some way

1. Offenders in periodic detention may be both under active supervision and attending detention simultaneously. Offenders in full time custody may be there for either a remand or a new sentence, and are generally unable to be actively supervised on their community order, however offenders may often only be in custody for a brief period of time (eg awaiting a court hearing for bail determination) which does not immediately impact on the ability of the order to be administered. The event which caused them to return to custody (for example, a new charge), may however have other repercussions, such as breach action, or an increase in supervision levels.

1. Number of order categories reflects the different types of orders to which an offender is subject, as offenders may have more than one order active at a time. "Category" level includes Intensive Correction Order, Home Detention, Community Service, Bonds and Parole. "Sub category" levels includes ,home detention, fine default, community service order, bail, bond, suspended sentence, drug court, probation as condition of CSO, Court parole, and Parole Authority parole. Offenders may also have multiple orders of the same sub-type (eg multiple bonds), although this is not shown here.

1. An active PSR means that the offender has new convictions which are before the courts awaiting sentencing, and COS is preparing a report to advise on the offenders eligibility for community based sentences. Offenders may also be referred to COS for pre sentence assessment by the courts without any additional supervision order. Those offenders are not counted here, and do not constitute part of the census population. However, PSRs do constitute a large portion of the workload of COS, with 26,526 such reports being prepared in 2010-11.

1. Minimum contact levels are based on current Departmental policy guidelines for ICUs and indicate the minimum frequency of contact with the supervising compliance and monitoring officer. Attendance at work sites, participation in group programs and attendance at treatment or counselling sessions would take place in addition to the indicated contact frequency.

2. Offenders commencing an ICO are normally placed at supervision level 2, corresponding to fortnightly contact. There is normally an administrative lag between when an offender is placed on an ICO and recording of supervision level.

3. This list is not exhaustive and is restricted to certain factors contained in the Level of Service Inventory - Revised (with the exception of Domestic Violence, see below) which is used to assess offenders under supervision. Only those factors considered to be the most concise have been utilised, although it should be noted that even this list contains items which are quite broad in nature.

4. Domestic violence is determined by a combination of assessment and available offence data relating to breach of Apprehended Domestic Violence Orders, and may not always involve offences for physical violence, indeed the offender may also be a victim. In some cases sufficient data is not available to determine if domestic violence is relevant or not, therefore these figures should be taken only as an approximate indication of domestic violence as a general issue that impacts the offender in some way.
