

GIPA Regulation - Part 3 2a - internal configurations on plans

Schedule 1 of the Regulation Part 3, 2a requires Councils not to provide “ the plans and specifications for any residential parts of a proposed building, other than plans that merely show its height and its external configuration in relation to the site on which it is proposed to be erected”.

It is very difficult for Councils to redact this information from plans prior to providing public access and it is noted that real estate agents always show the internal configuration of residential houses for sale.

I understand that the Department of Justice has not yet completed its review of the operation of the GIPA Act and, as such, I ask that this matter be given consideration of part of the current review.
