| ROSH | Risk of Significant Harm |
| SARA | Safety Assessment, Risk Assessment and Risk Reassessment |
| TFM | Their Futures Matter |
| UAC | University Admissions Centre |

# Communities and Justice Core Client Outcome and Indicator Bank

The Department of Communities and Justice (DCJ) has developed a Core Client Outcome and Indicator Bank. This will support us to identify and use outcomes and indicators that are relevant to our work.

This document explains what the core client outcome and indicator bank is, why it was developed and how it can be used. It then lists the core client outcomes and indicators developed for use by DCJ. It contains preliminary analysis and identification of relevant existing data sources that may be used to measure client outcomes; existing measures and counting rules and information about whether the data may be available for DCJ specific population groups.
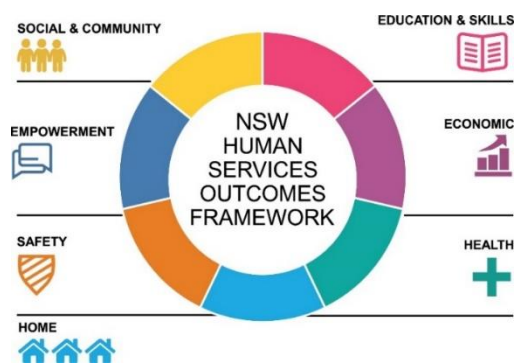

## What is the Communities and Justice Core Client Outcome and Indicator Bank?

The Core Client Outcome and Indicator Bank (Indicator Bank) is a catalogue of identified client outcomes and indicators. It contains:

- the full list of core client outcomes and indicators

- preliminary analysis of identified data sources

The Indicator Bank consists of 37 outcomes that are relevant, but not exclusive to all DCJ clients.

They are outcomes that are crucial to client wellbeing. The Indicator Bank includes 116 indicators to measure these outcomes. These outcomes and indicators have been mapped to the NSW Human Services Outcomes Framework.

The Indicator Bank is not an exhaustive list of client outcomes and indicators. It will be updated and revised as new information, evidence and data becomes available.

## Why was the Core Client Outcome and Indicator Bank developed?

The Indicator Bank was developed to support DCJ to measure client outcomes.

Measuring client outcomes enables us to better understand and meet the needs of clients. It provides important information about the quality of our programs, so we can improve our services and ensure they make a long-term positive difference in our client's lives. It also

supports us to build the evidence base for our programs, so we can do more of what works and less of what doesn't.

## How will the Core Client Outcome and Indicator Bank be used?

The Indicator Bank supports DCJ to identify, measure and commission for client outcomes.

The Indicator Bank could be used to identify long-term client outcomes that a program or service is trying to achieve. All 37 core client outcomes are listed in the bank. You can sort the outcomes by domains: Home, Safety, Education & Skills, Economic, Health, Social & Community and Empowerment.

Once you have identified the outcomes relevant to your work, you can use the bank to identify relevant indicators to measure client outcomes. There are 116 indicators in total. Each outcome has at least one indicator to choose from.

We can use these indicators to consistently monitor the impact of our services and programs. We can use this information to inform discussions about future service delivery i.e. how we deliver services, what services should be prioritised and what services need to be adapted to achieve better outcomes.

## What are the data gaps?

A full set of data is required to understand client outcomes and how they were achieved. Indicators, measures and data have been identified to track each core client outcome. These are provided below in our Indicator Bank.

There are currently gaps in the availability of outcome data. Our data gap analysis showed that only 25 of the indicators (22%) have data available within DCJ for at least one client group; 16 further indicators (14%) have data available from other agencies through data linkage. More than half of the indicators have no existing data source identified and new data are required.

In addition to client outcome information, to fully understand the impact of our services on clients, robust data needs to be collected on client needs and risks, the services they receive, costs and efficiency, and client experience.

## What's next?

### Tracking core client outcomes

Additional work is being conducted to identify the information, evidence and data that is needed to track the core client outcomes. Some of this data is already available to DCJ (e.g. child protection data, housing data). However, some of this data needs to be obtained by data linkage with other government departments (e.g. education and health data).

In addition, research and evidence development needs to be undertaken to create appropriate measures for new outcome indicators.

# How to read the Indicator Bank

The Core Client Outcome and Indicator Bank is broken up into the seven domains of the NSW Human Services Outcomes Framework: Safety, Home, Social & Community, Empowerment, Health, Education & Skills and Economic.

Under each domain is listed the relevant core client outcomes and their corresponding indicators. Where we have been able to, preliminary analysis of identified data sources is provided including existing measures and counting rules and information about whether the data may be available for DCJ specific population groups. Below is an example of how each of the core client outcomes and indicators are presented.

## Example

| Core Outcome | Outcome Indicators |
|---|---|
| **Core client outcome area** | Identified outcome indicator |

| | |
|---|---|
| **Data Source** | Department/ Organisation who owns/manages the data |
| **Indicator measure** | Existing measure identified as relevant in measuring the indicator |
| **Measure source** | Where the indicator comes from |
| **Data report** | The data report the measure comes from |
| **Data elements** | Elements that make up the indicator |
| **Counting rules** | An understanding of how the indicator is counted |
| **Subgroups/Client populations** | Relevant DCJ populations for which the data is available |

## Safety ⚠️

| Core Outcome | Outcome Indicators |
|---|---|
| People are safe from abuse and neglect | Rate of children and young people at Risk of Significant Harm (ROSH) per 1,000 of population |

| | |
|---|---|
| **Data Source** | DCJ data |
| **Indicator measure** | ROSH reports |
| **Measure source** | Existing DCJ measure |
| **Data report** | ChildStory – Client Information Warehouse |
| **Data elements** | Number of ROSH reports per person<br>NSW 0-17 population |
| **Counting rules** | Numerator: Number of children and young people in NSW reported at ROSH<br>Denominator: Children and young people aged 0-17 years in the NSW population in the period |
| **Subgroups/Client populations** | Targeted Early Intervention<br>Child protection and OOHC |

| Core Outcome | Outcome Indicators |
|---|---|
| People are safe from abuse and neglect | Proportion (%) of children and young people assessed at high- or very high-risk |

| | |
|---|---|
| **Data Source** | DCJ data |
| **Indicator measure** | SARA |
| **Measure source** | Existing DCJ measure |
| **Data report** | ChildStory – Client Information Warehouse |
| **Data elements** | Persons score on risk assessment |
| **Counting rules** | Numerator: Number of children and young people with a completed field assessment with a related Risk Assessment in the period with the Risk rating was high or very high<br>Denominator: Number of children and young people with a completed field assessment with a related Risk Assessment in the period |
| **Subgroups/Client populations** | Child protection and OOHC |

| Core Outcome | Outcome Indicators |
|---|---|
| People are safe from abuse and neglect | Proportion (%) of children and young people re-reported at ROSH |

| | |
|---|---|
| **Data Source** | DCJ data |

| Indicator measure | ROSH reports |
|---|---|
| Measure source | Existing DCJ measure |
| Data report | ChildStory – Client Information Warehouse |
| Data elements | Person re-reported at ROSH status |
| Counting rules | There are various versions of this measure, essentially is a ROSH report following an event of interest (for e.g. an intervention) |
| Subgroups/Client populations | Child protection and OOHC |

| Core Outcome | Outcome Indicators |
|---|---|
| People are safe from abuse and neglect | Proportion (%) of children and young people in Out-of-Home-Care reported at ROSH post restoration |

| Data Source | DCJ data |
|---|---|
| Indicator measure | ROSH reports |
| Measure source | Existing DCJ measure |
| Data report | ChildStory – Client Information Warehouse |
| Data elements | Data elements under development |
| Counting rules | Counting rules being developed by IM-ICT with input from business SMEs including FACSIAR |
| Subgroups/Client populations | Child protection and OOHC |

| Core Outcome | Outcome Indicators |
|---|---|
| People are safe from abuse and neglect | Rate of children and young people entering care per 1,000 of population |

| Data Source | DCJ data |
|---|---|
| Indicator measure | Derived from administrative data |
| Measure source | Existing DCJ measure |
| Data report | ChildStory – Client Information Warehouse |
| Data elements | Persons in care status<br>NSW 0-17 population |
| Counting rules | Numerator: Number of CYP entering OOHC in period<br>Denominator: All children and young people aged 0-17 years in the NSW population in the period |
| Subgroups/Client populations | Child protection and OOHC |

| Core Outcome | Outcome Indicators |
|---|---|
| People are safe from abuse and neglect | Proportion (%) of people who report feeling safe at home |

| Data Source | New data |
|---|---|
| Indicator measure | QAF<br>Does the child feel safe in their current placement?<br>POCLS (recommended measure)<br>Do you feel safe where you live now? |
| Measure source | QAF; POCLS |
| Data report | Nil |
| Data elements | Persons indication if they feel safe |
| Counting rules | Numerator: Number of people who feel safe<br>Denominator: Number of people surveyed |
| Subgroups/Client populations | N/A |

| Core Outcome | Outcome Indicator |
|---|---|
| Parents, carers and kin have the skills and capacity to keep children and young people safe at home | Proportion (%) of parents engaged in positive parenting techniques |

| Data Source | New data |
|---|---|
| Indicator measure | PSDQ<br>Note: this is a 133-item parenting questionnaire and may not be appropriate |
| Measure source | TFM |
| Data report | Nil |
| Data elements | Data elements should be developed in consultation with TFM |
| Counting rules | Counting rules should be developed in consultation with TFM |
| Subgroups/Client populations | N/A |

| Core Outcome | Outcome Indicator |
|---|---|
| Parents, carers and kin have the skills and capacity to keep children and young people safe at home | Proportion (%) of parents who have not engaged in risky and high-risk drinking patterns in the last 12 months |

| Data Source | NSW Ministry of Health |
|---|---|
| Indicator measure | NSW Population Health Survey:<br>Alcoholic drinks are measured in terms of a "standard drink". A standard drink is equal to 1 middy of full-strength beer, 1 schooner of light beer, 1 small glass of wine or 1 pub-sized nip of spirits. On a day when you drink alcohol, how many standard drinks do you usually have?<br>1 Record number of drinks |

|  |  |
|---|---|
|  | X Don't know<br>R Refused |
| **Measure source** | HeathStats |
| **Data report** | Nil |
| **Data elements** | Number of standard alcoholic drinks a person has in a day |
| **Counting rules** | Numerator: Number of parents who have < 2 standard alcoholic drinks on a day<br>Denominator: Number of parents surveyed |
| **Subgroups/Client populations** | N/A |

| Core Outcome | Outcome Indicator |
|---|---|
| Parents, carers and kin have the skills and capacity to keep children and young people safe at home | Proportion (%) of parents who have not used an illicit substance in the last 12 months |

| **Data Source** | DCJ data |
|---|---|
| **Indicator measure** | QAF measure under development<br>POCLS (Recommended)<br>The next few questions are about drug use other than for medical reasons (e.g. marijuana, ecstasy, speed, pills). Have you had drugs in the last 12 months?<br>• Yes<br>• No<br>• Pass |
| **Measure source** | POCLS |
| **Data report** | Nil |
| **Data elements** | Persons status of illicit drug use in last 12 months |
| **Counting rules** | Numerator: Number of parents who have not used an illicit substance<br>Denominator: Number of parents surveyed |
| **Subgroups/Client populations** | N/A |

| Core Outcome | Outcome Indicator |
|---|---|
| Children and young people grow up in families and communities that are stable and supportive with strong relationships | Proportion (%) of children and young people who report the presence of relationships that facilitate disclosure of safety and wellbeing concerns |

| **Data Source** | DCJ data |
|---|---|
| **Indicator measure** | QAF |

|  | Does the child feel that they have someone to talk to if they didn't feel safe or cared for?<br>POCLS (recommended measure)<br>Ages 7-17yrs<br>When you have felt sad worried or angry, who did you talk to about it?<br>People you are living with now,  Your birth family, Your friends, Teachers or school counsellors, Caseworkers, Other person or group , No one, Pass<br>Ages 7-17yrs<br>If you have talked to someone about being worried, sad or angry, how helpful were they;<br>Very helpful, Quite helpful, Somewhat helpful, Not at all helpful,  Pass |
|---|---|
| **Measure source** | QAF; POCLS |
| **Data report** | Nil |
| **Data elements** | Persons indication of presence of relationship<br>Persons rating of how help the relationship is |
| **Counting rules** | Numerator: Number of children and young people who identified as having a relationship and the relationship was either "Very helpful" or "Quite helpful"<br>Denominator: Number children and young people surveyed |
| **Subgroups/Client populations** | N/A |

| Core Outcome | Outcome Indicator |
|---|---|
| Children and young people grow up in families and communities that are stable and supportive with strong relationships | Proportion (%) of children and young people who report high levels of emotional and social support |

| **Data Source** |  |
|---|---|
| **Indicator measure** |  |
| **Measure source** |  |
| **Data report** | Data under development |
| **Data elements** |  |
| **Counting rules** |  |
| **Subgroups/Client populations** |  |

| Core Outcome | Outcome Indicator |
|---|---|
| People feel that the importance of their family and culture is recognised, respected and understood | Proportion (%) of Aboriginal children and young people in Out-of-Home-Care managed by accredited Aboriginal community-controlled organisations |

| | |
|---|---|
| **Data Source** | DCJ data |
| **Indicator measure** | Derived from administrative data |
| **Measure source** | DCJ data |
| **Data report** | ChildStory - Client Information Warehouse (CIW) |
| **Data elements** | Data elements being developed |
| **Counting rules** | Counting rules being developed by IM-ICT with input from business SMEs including FACSIAR |
| **Subgroups/Client populations** | Child protection and OOHC |

| Core Outcome | Outcome Indicator |
|---|---|
| People feel that the importance of their family and culture is recognised, respected and understood | Proportion (%) of Aboriginal people who report having trust in providers of Government services |
| | Proportion (%) of Aboriginal people who report a service was respectful of their culture |
| | Proportion (%) of Aboriginal children and young people in Out-of-Home-Care with an age appropriate cultural plan |
| | Proportion (%) of CALD people who report having trust in providers of Government services |
| | Proportion (%) of CALD people who report a service was respectful of their culture |

| | |

| Core Outcome | Outcome Indicator |
|---|---|
| People are safe from domestic and family violence | Proportion (%) of people who reported experiencing domestic and family violence in the last 12 months |

| Data Source | |
|---|---|
| Indicator measure | |
| Measure source | |
| Data report | Data under development |
| Data elements | |
| Counting rules | |
| Subgroups/Client populations | |

| Core Outcome | Outcome Indicator |
|---|---|
| People are safe from domestic and family violence | Proportion (%) of people who have been a victim of a reported instance of domestic and family violence |

| Data Source | DCJ data |
|---|---|
| Indicator measure | Police reports |
| Measure source | DCJ data |
| Data report | Domestic violence data sets |
| Data elements | Victims of a domestic violence related assault recorded by the NSW Police Force |
| Counting rules | Numerator: Number of victims of a domestic violence related assault recorded by the NSW Police Force<br>Domestic violence definition: NSW Police flag whether criminal incidents that they record on their COPS (Computerised Operational Policing System) database are domestic violence-related. New South Wales police define domestic violence in line with the Crimes (Domestic and Personal Violence) Act 2007. Under this legislation a person has a domestic relationship with another if they are a spouse/partner, ex-spouse/ex-partner, boy/girlfriend (including ex), parent/guardian (including step/foster), child (including step/foster), sibling, other member of family (including kin), is living or has lived in the same household as other person, is dependent on the paid or unpaid care of the other person, or are involved in a "love triangle" (e.g. a woman's ex-partner and current partner would have a domestic relationship with each other for the purposes of this Act even if they had never met). Domestic violence can be considered as an associated factor for any criminal incident where the victim-offender relationship meets any of these criteria. |
| Subgroups/Client populations | N/A |

| Core Outcome | Outcome Indicator |
|---|---|
| People are safe from domestic and family violence | Proportion (%) of domestic and family violence perpetrators re-offending within 12 months |

| Data Source | DCJ data |
|---|---|
| Indicator measure | Police reports |
| Measure source | DCJ data |
| Data report | Domestic violence data sets |
| Data elements | Number of domestic violence assault offenders who were legally proceeded against by the NSW Police Force |
| Counting rules | Numerator: Number of distinct domestic violence assault offenders who were legally proceeded against by the NSW Police who had an earlier domestic assault charge in the last 12 months<br>Denominator: Number of distinct domestic violence assault reoffenders |
| Subgroups/Client populations | N/A |

| Core Outcome | Outcome Indicator |
|---|---|
| People are safe from domestic and family violence | Proportion (%) of domestic and family violence victims who are re-victimised |

| Data Source | DCJ data |
|---|---|
| Indicator measure | Police reports |
| Measure source | DCJ data |
| Data report | Domestic violence data sets |
| Data elements | Number of victims of domestic violence assault recorded by the NSW Police Force |
| Counting rules | Numerator: Number of distinct victims of domestic violence assault who were also victimised within the previous 12 months for a prior domestic assault incident<br>Denominator: Number of distinct victims of domestic violence assault |
| Subgroups/Client populations | N/A |

| Core Outcomes | Outcome Indicators |
|---|---|
| People are physically and emotionally safe in their communities | Proportion (%) of people who report feeling safe in their neighbourhood |
| | Proportion (%) of people who reported being a victim of personal crime (i.e. physical assault, threatened assault, robbery or sexual assault) in the last 12 months |
