Targeted Early Intervention (TEI) services - year to date (YTD) data

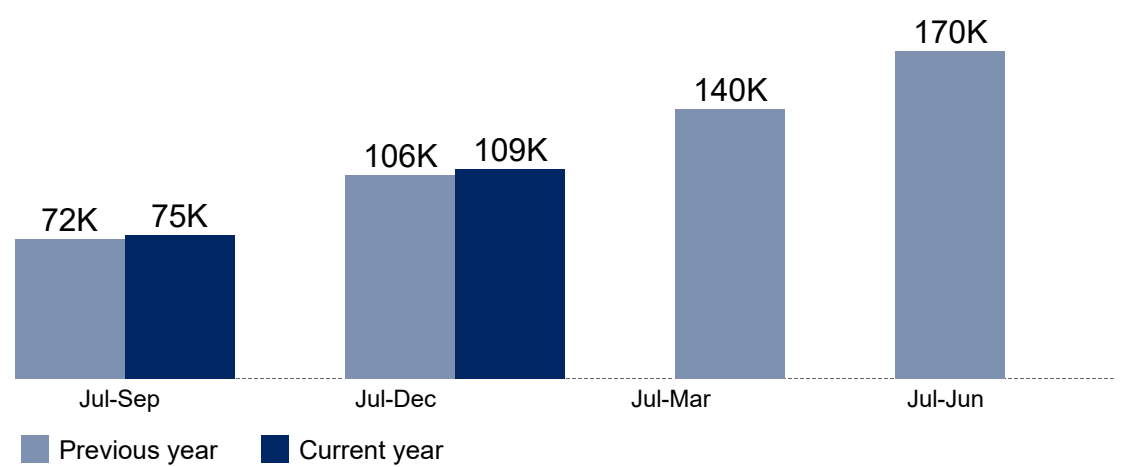

How many **individual clients** were seen in TEI from the first day of the financial year to the end of the quarter?

There were approximately **109K** individual clients who received TEI services from 1 July 2023 to 31 December 2023.

When compared with the same period in the previous year of **106K** individual clients who received TEI services, this is an increase of approximately **3K**.

Chart 1: TEI - Individual clients seen (YTD)

How many **group clients** were seen in TEI from the first day of the financial year to the end of the quarter?

There were approximately **656K** group clients who received TEI services from 1 July 2023 to 31 December 2023.

When compared with the same period in the previous year of **585K** group clients who received TEI services, this is an increase of approximately **71K**.

Chart 2: TEI - Group clients seen (YTD)

How many **total sessions** were delivered in TEI from the first day of the financial year to the end of the quarter?

There were approximately **252K** TEI sessions delivered from 1 July 2023 to 31 December 2023.

When compared with the same period in the previous year of **244K** TEI sessions delivered, this is an increase of approximately **8K**.

Chart 3: TEI - Total sessions delivered (YTD)

Accuracy of Indigenous Status Data: this product includes data disaggregated by Aboriginal and Torres Strait Islander status. Prior to considering the data it is necessary that you read, understand and apply the data quality statement supplied. Please follow the link provided to better understand the factors that impact upon the quality of the Aboriginal data. (Indigenous Status and Aboriginal Status is used interchangeably in most data collections and in many collections Aboriginal Status includes Torres Strait Islander).

For more information, please [click here](#)

Note on data ageing: Data ageing refers to the requirement of a time lag in extracting data for reporting to accommodate the time between when a service activity occurs and when it is entered into a client system. The time lag is determined by the minimum amount of time for data to be sufficiently complete in the source system to be accurately reported. For example, caseworkers who see families in the community are not able to enter data in real time, so a period of time is allowed for that data to be entered. Data is typically aged for two months before extraction. As such there is a minimum of two and a half month lag between the end of a reporting period and the availability of finalised data. For example data for the reporting quarter ending 30 June will not be published until end 30 September at the earliest.

Notes:

1. Data on Targeted Early Intervention (TEI) Services from the Department of Social Security (DSS) DataExchange (DEX) platform was first reported in the September 2020 Caseworker Dashboard.
2. Finalised data on Targeted Early Intervention (TEI) services is available 6 monthly. Consequently from 2022-23, YTD Q1 data will be reported at the same time that YTD Q2 data is reported. Similarly YTD Q3 data will be reported at the same time that YTD Q4 data are reported.
3. TEI data for 2020-21 can be accessed [here](#).
